APMP for PRINCE 2® Practitioners Course and exam

APMP (IPMA Level D) is a knowledge based qualification. Successful candidates are able to participate in projects from individual assignments through to large capital projects. APMP is a qualification recognised both nationally and internationally that successful candidates can carry from one job to another or from one industry to another.

APMP for PRINCE2® Practitioners recognises the prior learning achieved in becoming qualified to PRINCE2® level. This route to APMP covers 25 of the 37 APMP knowledge areas from the APM Body of Knowledge. Knowledge of these areas is considered fundamental to the professional management of projects.

This APMP assessment involves one two hour written essay-based paper. APMP assesses the candidate's breadth of knowledge in all areas of project management, from strategic and commercial implications, to the technical, organisational, and people management skills required to participate effectively within a project team.

This qualification allows candidates to demonstrate knowledge of all elements of project management in order to assist in the management of projects. Candidates with this qualification will be able to demonstrate an understanding of how these elements interact. They will also be able to understand how their project fits into their strategic and commercial environment.

Our approach to learning uses process based learning techniques that focus on the practical application of the tools and techniques rather than just theory. You can also combine this option in an Advance Learning Package you will be several steps ahead in your career development plan.

PRINCE2® is the Registered Trade Mark of the Office of Government Commerce in the United Kingdom and other countries.

Now available as a Learning in a Box option

The APMP is now available in our new learning system, Learning in a Box.

One of the most advanced learning systems of its type, it combines distance learning with live interactive materials and a managed learning environment. When candidates receive their learning in a box, they are allocated a tutor who will guide them through the sessions, exercises and simulations.

Learning partnership

Our dynamic progressive pricing means that if you plan ahead that helps us reduce our costs and we share that savings with you.

By working in partnership with you we hope that you will benefit from a long term relationship with Edison, supporting you through your project management career. Learning partnerships don't just mean helping you today but keeping you attuned to all the current trends that will influence your career tomorrow.
